

Pollination Scavenger Hunter

On the Foodway at Concrete Plant Park

The foodway at Concrete Plant Park is full of plants that offer both pollen and nectar to a variety of pollinating insects and birds. In exchange for helping to pollinate the plants, the plants offer offer sweet food to eat and habitat to live!

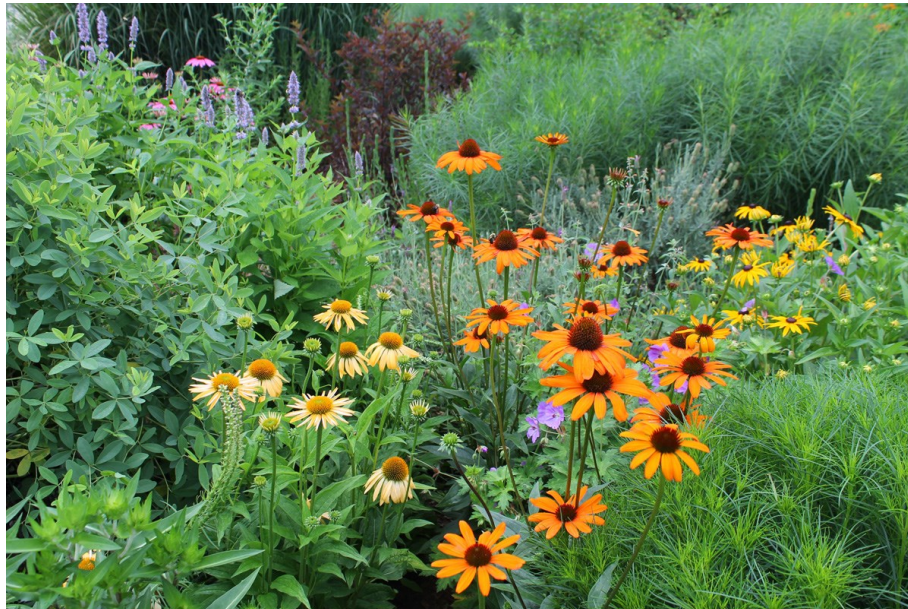

Directions:

Flip this sheet over and explore the garden to find each pollinator and its plant!
Stay on the path and “*bee*” careful not to step on any plants!

Words to Know:

Pollinator: an animal that moves pollen and can effect pollination

Pollination: the transfer of pollen grains from one flower to another that leads to seed formation

**For more information about pollinators visit the foodway online at:
www.bronxriver.org/ or contact Foodway@bronxriver.org**
